Vivid T8 - Ultra Edition

POWERED BY AI, ELEVATED BY YOU

Designed for your busy practice, Vivid T8 Ultra Edition provides reliable and solid design, powered with AI applications for extreme productivity without compromising quality of care. Enjoy long-term peace of mind with modern and secure software design, remote updates, and warranty coverage.

MODERN ERGONOMICS

Sleek and maneuverable design with ergonomic user interface

21" ultra-high-resolution, wide format, color screen

10.1" high-resolution touch panel

Ergonomic transport push handle

Convenient operating panel with integrated alphanumeric keyboard

Cable management hooks

Printer and Video printer shelf (optional)

Removeable and cleanable storage bin

Large wheels for easy system transport

Compact and maneuverable design - A lightweight (60 kg / 132 lbs) system with compact footprint

Eco-friendly design - Extremely silent system with average noise level of 31 dB.
Black & white inverted printing, preventing waste of ink and paper

Powered by AI

Ultra Fast. Ultra Precise. Ultra Efficient.

Vivid T8 Ultra Edition introduces the latest AI-based technology to help reduce user fatigue and improve workflow efficiency. Diagnose more confidently and accelerate exams via automated (AI-driven) Cardiac Doppler and 2D LV measurements.

The results are impressive. Exam time is reduced, operator fatigue minimized.

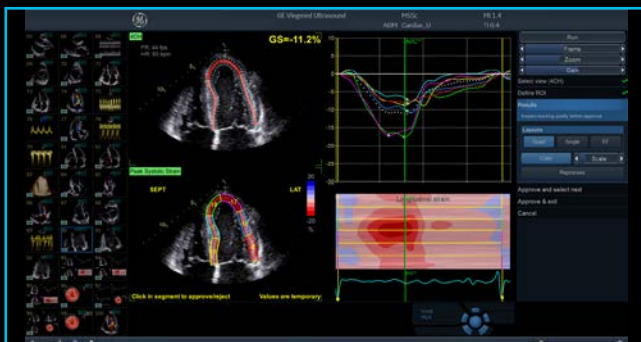

Cardiac Auto Doppler with AI **AI**

Semi-automatic Cardiac Doppler measurements. Enhances reproducibility of follow-up studies when used in automated mode², offers Doppler measurement in multiple cardiac cycles as recommended by guidelines for irregular heart rhythms.^{3,4}

REDUCED TIME PER MEASUREMENT²

UP TO
93%

AFI LV with AI-based View Recognition **AI**

Powered by AI-based View Recognition, AFI LV provides semi-automated quantification of left ventricular global and segmental strain. It offers advanced industry pioneered speckle tracking algorithm for quantifying myocardial deformation and with the integration of ejection fraction calculation.

DETECTABILITY¹

98%

AutoEF with Optional ECG

Use AutoEF on your adult patients with or without ECG to quickly and easily validate your visual assessment.⁵

Benefits:

- Standardized patient ejection fraction trending
- Improved patient comfort and time saving by eliminating the need to attach and tear-down ECG electrodes⁵

AutoEF achieves fast measurements of ejection fraction, and allows for assessment of the LV ejection fraction also on data sets acquired on other vendor's systems⁵. GE's AutoEF, provides semi-automated quantification of left ventricular volumes and ejection fraction.

VIVID HEART APPLICATIONS

A wide range of clinical applications for use in echo exams and your cardiovascular practice.

B-Mode

The complete range of cardiological probes offers the best possible spatial, temporal and contrast resolution across adult and pediatric patients.

Color flow

State-of-the-art transducer technology delivers you excellent color sensitivity, contrast resolution and color depth.

PW / CW Doppler

The sensitive spectral Doppler enables reproducible Doppler measurements, in both adult and pediatric TTE and TEE examinations.

Curved Anatomical M-Mode

View Anatomical color and tissue velocity in M-mode. Adjust the cursor at any plane, in live imaging or with recalled images.

LVO Contrast

Benefit from high-resolution detection of contrast in the LV cavity with LVO Contrast and excellent suppression of myocardial tissue signals on the Vivid T8 Ultra Edition new Coded Phase Inversion (CPI).

Smart Stress

Over 17 imaging parameters from each plane can be saved and recalled at each stress level, reducing system adjustments during acquisition.

Clinical excellence beyond Cardiology

The demand for multi-purpose, cost efficient ultrasound systems with uncompromised image quality is growing. With the aging population, vascular and abdominal exams are increasingly challenging.

Vivid T8 Ultra Edition provides you great 2D and color flow imaging across applications. Efficient workflow, a wide range of linear and curved probes and dedicated quantification tools ensure the confidence you need for speedy and accurate diagnosis also under challenging conditions.

Vascular

Develop fast and complete quantitative assessment of vascular anatomies with dedicated probes and presets.

Abdominal

Visualize abdominal tissue with clarity thanks to Vivid T8 Ultra Edition's high-resolution imaging and dedicated imaging presets.

WORKFLOW INTEGRATION

EchoPAC Software Only and EchoPAC Plug-in:

- Analyze and review data from GE Healthcare Vivid family of scanners, as well as DICOM images from other ultrasound systems
- Access all Vivid measurement and review tools utilizing GE Healthcare Raw Data or industry standard DICOM data
- DICOM Image transfer with optional GE Healthcare Raw Data transfers images easily in your existing workflow
- DICOM SR Measurement Transfer including standard and custom measurement allows seamless integration with GE Healthcare and other industry reporting systems and EMRs ⁶

EchoPAC Plug-in is available for:

- GE Healthcare Centricity™ Cardio Enterprise with Intelligent Reporting (IR)
- GE Healthcare ViewPoint™ 6 with EchoPAC Suite ⁷
- As a plug-in to third party PACS

SonoDefense

Advanced cybersecurity
and data privacy protection

Facility echosystem
Network firewall
Windows 10 hardening
Malware protection
Local/remote access management
PHI Encryption

Unleash the power of **connected** devices

Your Vivid system has been designed to provide you with an optimal user experience.

Connectivity is the key element to enjoy it fully, whenever and wherever you need it, regardless of site access restriction and planning constraints.

Discover a new world of services, included in every package:

REMOTE TECHNICAL SUPPORT

ACCESS TO EXPERTS ANYTIME, ANYWHERE

InSite™ connectivity enables OnDemand and real-time access to remote GE Healthcare experts

- Reduce disruptions
- Decrease system downtime
- Improve asset usage and staff productivity

It provides secure remote connectivity without requiring any open inbound ports or VPN connection.

REMOTE FIX

 **UP TO 40%**

issues fixed remotely
with InSite™⁸

NEW REMOTE SUPPORT

REAL-TIME AND INTERACTIVE APPLICATIONS SUPPORT

Digital Expert⁹ and **STAR** provide an interactive, real-time, flexible & convenient way to get education and support.

- May help improve training outcomes
- Increase capacity and efficiency
- Train staff on a short timeline

NEW AUTOMATED UPDATES

NO NEED TO WORRY ABOUT YOUR SYSTEM SAFETY

Get automated software updates with **eDelivery** along with safety patches enabled by remote software download. **SonoDefense** provides the highest level of cybersecurity to keep your systems up-to-date, with no impact on your operations. No on-site intervention needed.

PREDICTIVE MAINTENANCE

KNOW THE FAILURE BEFORE IT OCCURS

Transform unplanned downtime into planned service events with **OnWatch** technology. It provides automated, 24/7 system monitoring, capable of detecting a system failure before it occurs. Any deviation alerts our GE Healthcare engineers, who proactively work to keep your operations running smoothly.

COST SAVINGS

 **UP TO 90%**

cost reduction, based on
OnWatch alerts⁸

DATA DRIVEN INSIGHTS

ALL THE INSIGHTS YOU NEED TO DECIDE, AT YOUR FINGERTIPS

Better decisions start with better data **iCenter™** is a secure, cloud-based asset management tool that offers comprehensive data analytics for your systems. It provides insights to make informed decisions and helps improve operational performance, optimize patient flow and maintain compliance standards.

UpdateMe is a complementary app that gives you access to the data 24/7 directly on your smartphone. You can receive notifications and create a service request anytime, anywhere.

About GE Healthcare

GE Healthcare is a leading global medical technology and digital solutions innovator. GE Healthcare enables clinicians to make faster, more informed decisions through intelligent devices, data analytics, applications and services, supported by its Edison intelligence platform. With over 100 years of healthcare industry experience and around 50,000 employees globally, the company operates at the center of an ecosystem working toward precision health, digitizing healthcare, helping drive productivity and improve outcomes for patients, providers, health systems and researchers around the world.

1. The Role of AI in Streamlining Echocardiography Quantification White Paper, Kristin McLeod - JB00888XX
2. Based on results of time and motion study conducted by GE "JB49055XX - Cardiac Auto Doppler"; study results indicated time savings related productivity increase up to ~8 on an annual basis for a facility per sonographer
3. European Association of Echocardiography recommendations for standardization of performance, digital storage and reporting of echocardiographic studies (Eur Journal of Echo 2008 – Evangelista, Badano, Monaghan, Zamorano, Lancellotti).
4. Recommendations for Quantification of Doppler Echocardiography: A Report From the Doppler Quantification Task Force of the Nomenclature and Standards Committee of the American Society of Echocardiography (JASE 2002)
5. AutoEF without ECG is available only for GE Vivid RAW data. See the product User Manual for list of prerequisites for successful operation of AutoEF without ECG.
6. With the DICOM SR support, Measures & Analysis (M&A) for an exam can be sent at the end of the exam or when exported from local archive. The destination can be either a server on the network (Storage SCP) or a removable media (DICOM Media) depending on the DICOM dataflow selected. Custom measurements supported only for Adult Echo (TID5200) and Pediatric Heart (TID5220).
7. EchoPAC Suite is a marketing name for EchoPAC Plug-in
8. GE internal data
9. Digital Expert is only offered in the USA
